

hibernate的Utils工具类:

```
package utils;

import org.hibernate.Session;
import org.hibernate.SessionFactory;
import org.hibernate.cfg.Configuration;

/**
 * hibernate开发的工具类
 * @author Anly
 *
 */
public class hibernateUtils {
    private static Configuration cfgConfiguration = null;
    private static SessionFactory factory = null;
    //只需要执行一次
    static {
        cfgConfiguration = new Configuration();
        cfgConfiguration.configure();
        factory = cfgConfiguration.buildSessionFactory();
    }

    /**
     * 让外部提取session对象
     */
    public static Session getSession() {
        return factory.openSession();
    }
}
```

Junit测试单元:

```
@Test
public void test1() {
    user user = new user();
    user.setName("jiming");
    user.setPassworld("250016");
    Session session = hibernateUtils.getSession();
    Transaction ts = session.beginTransaction();
```

```
session.save(user);  
ts.commit();  
session.close();  
}
```
